

Ullman Sails Product Lines

July 13, 2010

The Ullman Sails Product Lines are set by Ullman Sails International to standardize product names throughout the group. The product lines correspond to both the Ullman Sails marketing brochures and the construction manual. The product names are intended to be used as marketing tools. Lofts are not required to offer all of these products.

Below is the name of each product line followed by a description of construction and materials for the sails in that category. The FiberPath products are listed in their respective categories as well as a FiberPath-only section.

Racing Upwind Series

Grand Prix Race Series

- Radial Panels
- Carbon Laminates
- FiberPath GP Race

Race Series

- Crosscut Dacron
- Crosscut Laminates – Max (Contender) or Flex (DP)
